

# Adventures in STEM Coloring Book

# SCIENCE

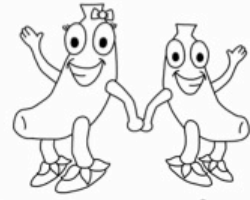

Chemists, like Banana Kevin, study the tiny particles that make up our universe. They can discover materials or make new ones.

Nana could be an Ecologist, a scientist who studies nature. That way, she could help save the environment!

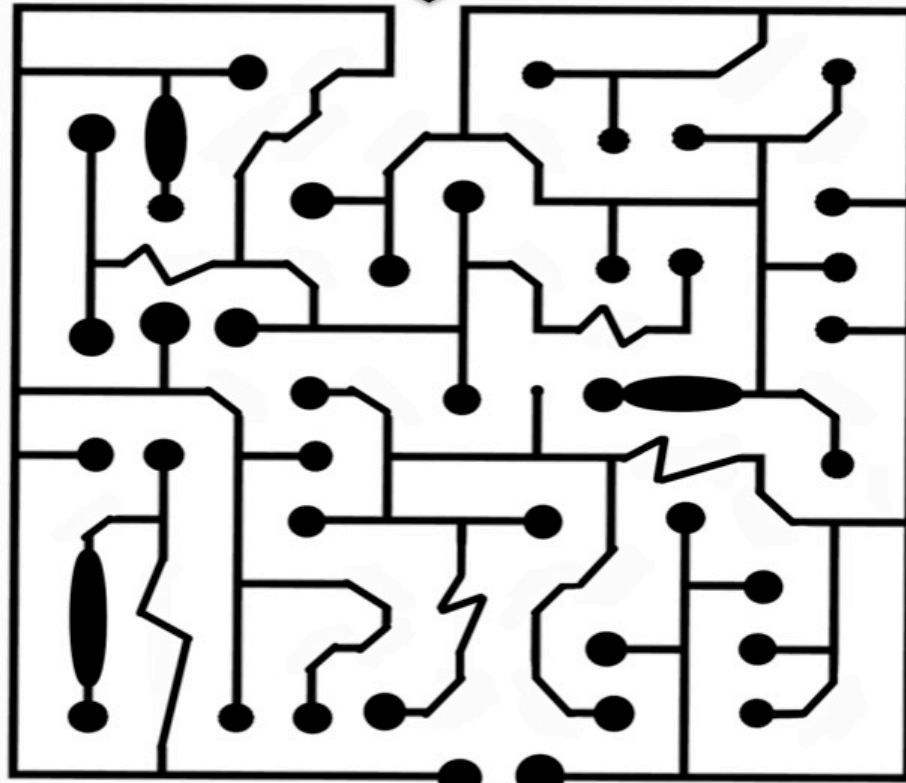

# TECHNOLOGY

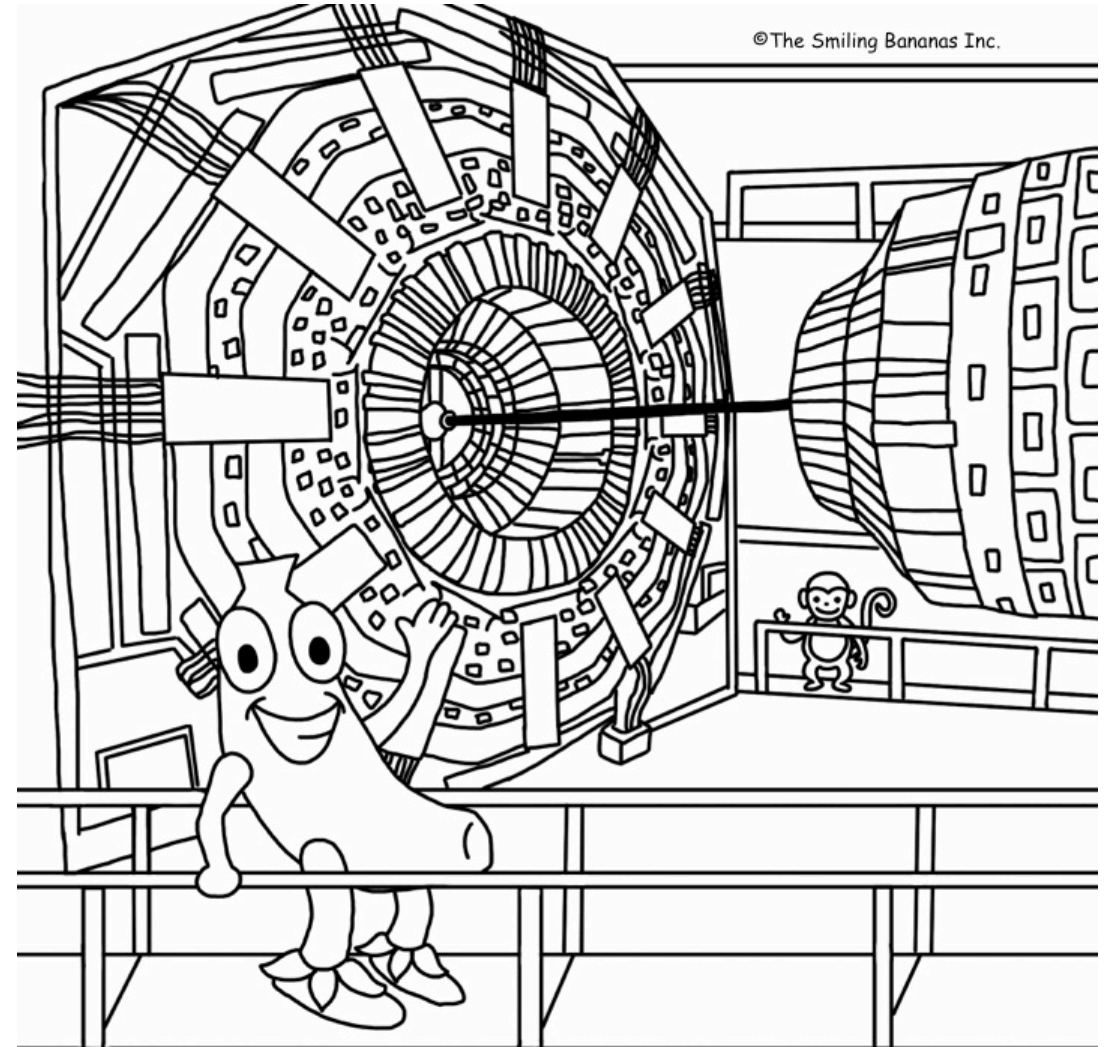

Computers are an important kind of Technology. Help Nana find her way through the computer circuit maze!

Particle physicists, like the ones working at the Hadron Collider in Cern, study how subatomic particles move in order to figure out how our universe began.

# ENGINEERING

Civil engineers, like Dan, leave their mark on our world by designing the buildings and bridges of our cities and towns.

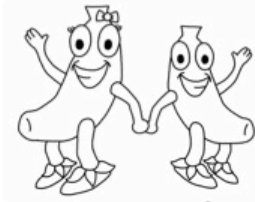

©The Smiling Bananas Inc.

Nana could be the first banana in space if she became an Aerospace Engineer. She could explore the last frontier and build spaceships.

# MATH

Part of Math is looking for patterns. Help Smiley complete these patterns and then color them in!

Now, draw your own pattern!

Smiley wants to be a Laser Technologist, that way, he could help produce cars and other machines.
